

# Engineering Physics: Mechanical Applications Option

## Bachelor of Science (BS)

# Mechanical Applications Option

Physics is perhaps the most fundamental of the sciences. It involves the study of the nature of basic things such as motion, forces, energy, matter, heat, sound, light, and the atom. Engineering is the profession in which basic knowledge from mathematical and natural sciences is applied to develop new ways to utilize the materials and forces of nature for the benefit of society.

Engineering physics is an interdisciplinary degree program combining the study of physics and engineering into one curriculum. Students acquire a thorough knowledge of physical and mathematical principles and also learn how to apply this knowledge to meet the needs of society. The interdisciplinary nature of this program produces graduates who can work in diversified fields and who can easily adapt their skills to the needs of their employers.

The engineering physics program is an engineering program that is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>, which is the agency that accredits all engineering programs in the United States. Our seniors take the Fundamentals of Engineering (FE) Exam, which is the first step to becoming a Registered Professional Engineer (PE). About 85% of our seniors pass this exam, which is well above the national average.

### Engineering Physics students will...

- Obtain a thorough understanding of the fundamental principles of science and mathematics underlying engineering and be able to apply them to meet the needs of society.
- Have the ability to design a system, component or process to meet needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability.
- Use the techniques, skills, and modern tools necessary for physics and engineering careers.
- Have the broad education to understand the impact of physics and engineering solutions in a global, economic, environmental, and societal context.
- Be prepared to pass the FE Exam.

### Career Planning

All graduates find employment in their field or start the graduate programs of their choice within a few months of graduation.

Demonstrated Career Proficiency is a Requirement of all Southeast Students		
CL001/CL002	First Semester	Complete the FOCUS2 assessment and develop a Career Action Plan.
CL003	Junior Year	Students gain information about career planning and job searching resources.
CL004	Senior Year	Students demonstrate advanced proficiency by identifying a position in their field, developing a cover letter, and tailoring a resume for the position. Materials are critiqued to ensure preparedness for a successful job search.

**Career Services**, located in Academic Hall 057, provides professional career advising to guide students in their career development.
