38 **Determining Credit Hours for Course Proposal Or Revision**

39
40 Any proposal for a new course or for a revision to the time allocation in an existing course must
41 identify the course type and must justify the proposed course credit hours by describing the
42 amount of time spent by the students in lecture, lab, or other activities. A course may include
43 components from more than one defined type, such as lecture and laboratory, with each portion
44 contributing to the total credit hours.

45 If a proposed course falls outside of the categories defined above, the credit hours assigned must
46 be justified by reference to the federal standard and the time spent in course activities.

47 Online and blended courses must justify the credit hours assigned by providing evidence of
48 achievement of student learning outcomes comparable to those achieved in an equivalent face-to-
49 face course.
