

## SupportNET Tracking Items

SupportNET for you to easily keep track of your students. When you have a concern with a particular student, or multiple students, you can make raise a **flag**, make a **referral**, or give a **to-do** to communicate that a student needs assistance. The appropriate individuals will be automatically notified when you save. You can also give positive reinforcement with a **kudo** to a student. Any of these items – flag, referral, to-do, or kudo is a tracking item within SupportNET.

## How to Give Kudos (Positive Encouragement!)

Much the same way as you raise a flag, you can add **Kudos** to acknowledge **positive progress/achievements** of students. Kudos almost always include an email to the student with the comments of the person who is adding the Kudos.

1. Find the student or students you are looking for and select one or more students by clicking the check boxes next to the students' name.
2. Select **Kudo**
3. Select the Kudo reason for the action you have requested and select a specific course (if applicable).
4. Add **Comments**. The Comment box is available to personalize the message with more information by adding in your own comments, which will be viewable to the student.
5. Click **Save**

**Create Kudos for Rowdy Redhawk** [Cancel] [Save]

Course Context

Comment

★ CONGRATS!!  
Send a congratulations note to student - comments are required!

★ Thank you!  
Raise this kudo when you catch a student doing something good whether academically or behaviorally.

Permissions: A tracking item must be selected to determine the sharing permissions
