THE SPIRIT TO EXPLORE.
THE WILL TO DO.

2020-2021
WELCOME
FROM DR. CARLOS VARGAS, PRESIDENT
“I came to the United States as an international student myself, so I understand the environment necessary to ensure the success of international students. At Southeast, we are committed to helping students from around the world achieve their academic dreams. Our combination of high-quality, real-world educational experiences, affordability, and commitment to student success — all set in a safe and welcoming community — make Southeast the right place for you to pursue your dreams.”

BECOMING A REDHAWK
When you become a student at Southeast, you become a Redhawk. We love our University, and we know you will love being part of the Redhawk flock, too. Southeast students get free admission to all athletic events, discounted tickets to performances at the River Campus, and plenty of opportunities to showcase their Redhawk pride!
PREPARING YOU FOR AN EXTRAORDINARY CAREER

At Southeast, you won't just be learning in the classroom, you'll be putting your knowledge into practice from your very first day. Whether it's in a lab, on a stage, at our very own research farm, in your own classroom, at Catapult Creative House, in a gallery, across the nation, or around the world, we don't just tell you about the profession you're going into. We give you the experience to do it. And, that's pretty helpful on a resume.

**SAVE TIME AND TUITION!**
Southeast offers accelerated graduate programs, allowing eligible students to take upper level courses that count for undergraduate and graduate credit!

**PRESTIGIOUS ACCREDITATIONS**
Our many demonstrate that Southeast meets rigorous national and international standards, giving you the best opportunity to start a career or enter a postgraduate program in the United States or abroad. Accreditations include ABET and AACSB International (Donald L. Harrison College of Business and Computing).

**THE JANE STEPHENS HONORS PROGRAM**
will expand your education, creativity, and leadership!

M.S. Environmental Science

“Southeast gave me a quality and hands-on education that involved directly working with professionals in my field and getting real-world work experiences. During the time I was working towards my B.S. in wildlife and conservation and M.S. in environmental science, I was able to volunteer and work with professionals from the Missouri Department of Conservation (one of the foremost conservation agencies in the U.S.). Through volunteering opportunities offered by Southeast Serves, I was selected for an internship for the same state agency while being on Curricular Practical Training (CPT) status, which led to me being hired as a full-time employee after graduation for the duration of my Optional Practical Training (OPT). Southeast gave me these opportunities and helped me develop my professional career to where I am today; pursuing a Ph.D. in Wildlife and Natural Resource Science and conducting wetlands research throughout the state of West Virginia.”

**PERSONALIZED SUPPORT**

One of the best things about Southeast is you can find the variety of program choices and resources that you'd find at a big university, but you get the personal support of a smaller university. So, whether you need advising, mentoring, tutoring or just somebody to listen, you'll find a team of faculty, staff, and experts here to make sure you won't have to do it alone.

“My English skills (Speaking, Listening, Writing, Reading) have been improving so fast in the IEP at SEMO. After studying English, I even found a job on campus. Even though I’m an international student, I don’t feel lonely at SEMO because I have made many good friends from different countries. We can have fun together through campus involvement in the interesting and attractive environment here. SEMO also has really supportive and really nice faculty and staff who help and guide you in the best way. You shouldn’t worry about anything—you can be the best version of yourself at SEMO.”
DEVELOPING LEADERS AND GLOBAL CITIZENS

With so many ways to communicate with people around the world, we understand that many industries operate on a global scale.
