

## SoutheastGameNet User Guide

The SoutheastGameNet network will allow game console (Xbox, PlayStation, Wii) users to bypass the Secure NAT type on our Resnet wireless network. This allows users to be able to access specific features for online games, chatting, and hosting games on campus.

### Policies and Procedures

1. SoutheastGameNet, the wireless network that is broadcast from the same access points that handle Resnet, allows students to play their game consoles to the full extent.
2. This network will be used for game consoles only. University websites are inaccessible from this network.

---

**Step 1:** Locate the game console's **Wireless MAC Address**. (For more information on locating game console network settings, visit <http://www.semo.edu/it/guides/gaming.html>.)

---

**Step 2:** On a computer that is already registered and connected to SoutheastResnet, navigate to <http://splat.semo.edu/gameconsoles>.

---

**Step 3:** Enter the Wireless MAC Address, i.e. example: A1:B2:C3:....

---

**Step 4:** On your game console select the **SoutheastGameNet** wireless network.

## SoutheastGameNet User Guide

**Step 5:** Enter the password **Q8!2xscnrto** (This password will be periodically changed. If your password fails, please check this guide for an updated password).

---

**Step 6:** Power off the game console for at least 2 minutes and then turn it back on.

---

**Step 7:** The game console should now be connected to the network.
