

PS4 – Connection to Southeast Ethernet

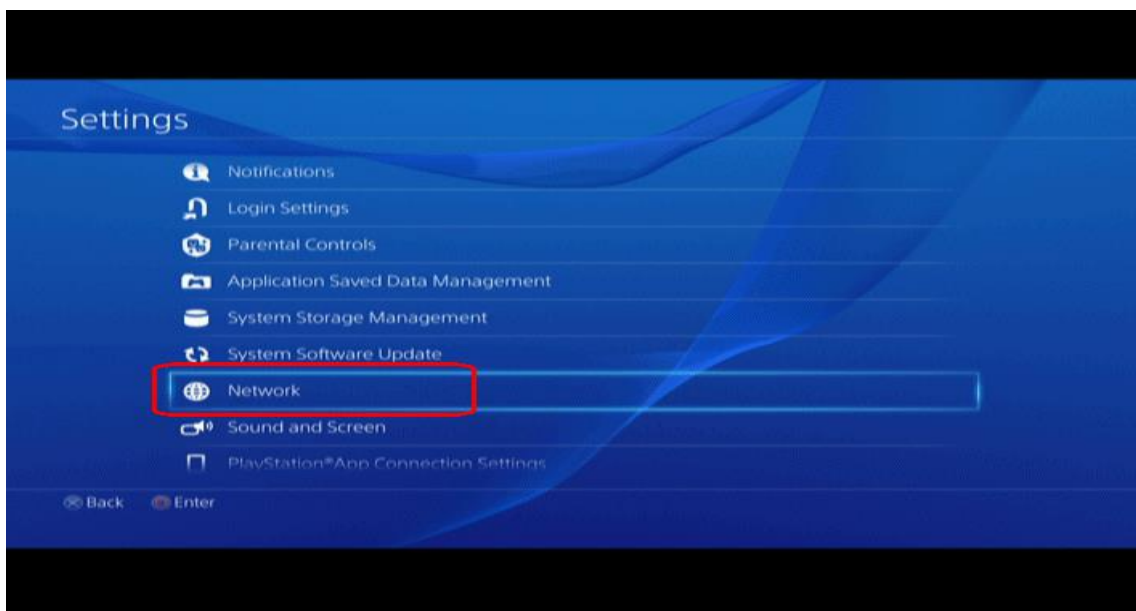

It is important to note that Wi-Fi media devices will be unable to use Southeast Secure/Southeast ResNet wireless services, as most do not come preloaded with the necessary software to be compatible with SEMO's wireless encryption – therefore a wired Ethernet connection must be used.

Finding the MAC Address

1. Open the Settings of the PS4 Advanced Menu List.

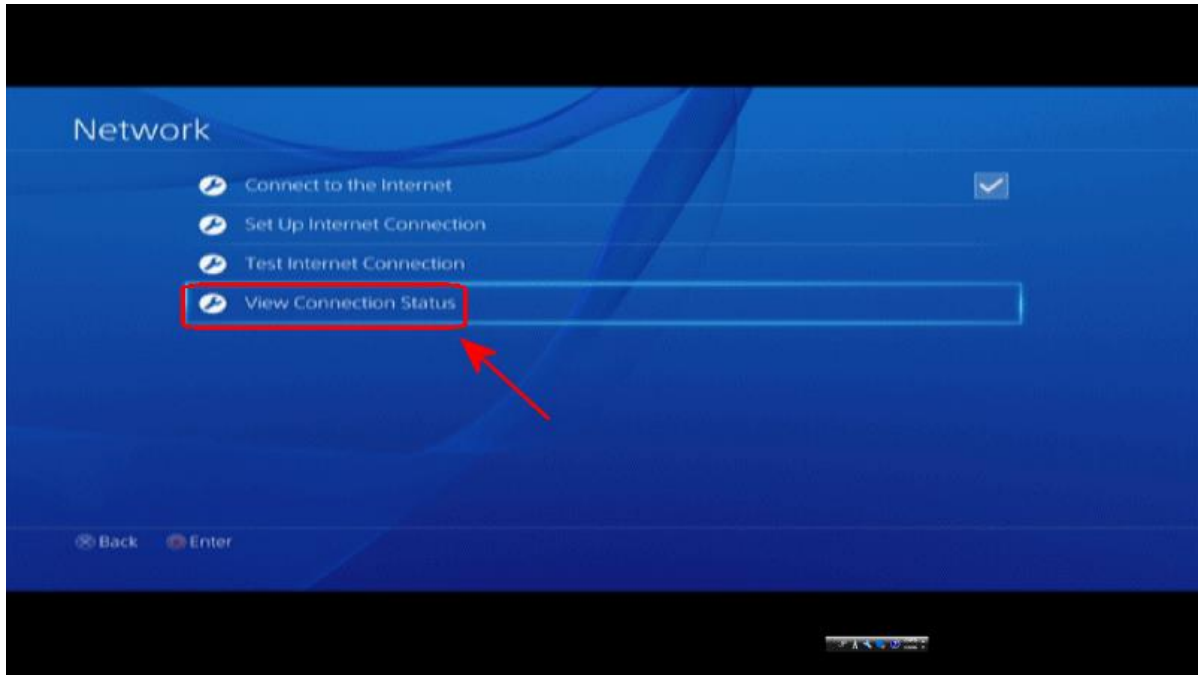

2. Open Network under the Settings Menu List.

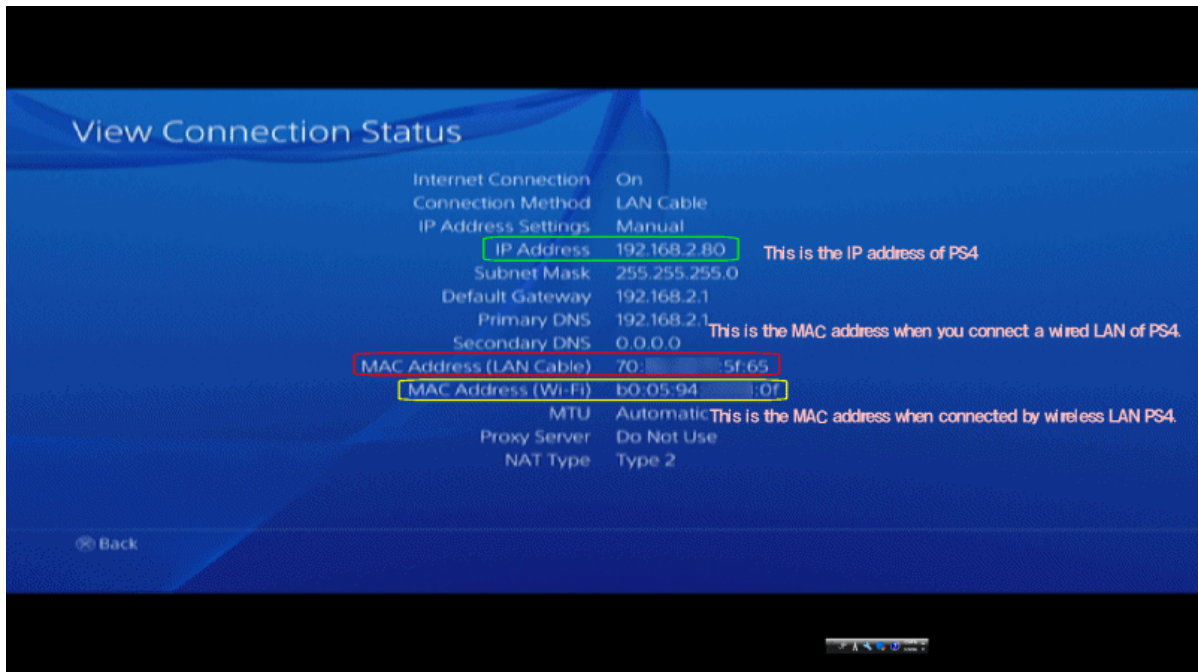

PS4 – Connection to Southeast Ethernet

3. Open the View Connection Status Menu.

4. The MAC Address should be listed for the LAN connection in Red.

Registering the Device on the Network

1. Using a computer, browse to <http://splat.semo.edu/gameconsoles/>

PS4 – Connection to Southeast Ethernet

2. Enter your **Southeast Key** and **Password** for the Username and Password, and type the aforementioned MAC address into the MAC address field, ensuring to keep the colons in the address.
3. If you agree to the User Policies, select “Accept”.
4. Restart the device, and check to ensure that it is connected.
