

Links, Resources, and News for Southeast Parents

## Greetings Redhawk Parents!

I hope you had a wonderful winter break with your student and you're both ready to start a new semester!

This will be an abbreviated issue of the Parents newsletter because there are only a few important things we need to share as we start the spring semester. First is information about a new alert system Southeast is implementing which will allow you the option of receiving communications along with your student. And, second are some big dates you should save on your calendar.

As always, if you need anything or any issues arose over the winter break that you need assistance with or have questions about, please don't hesitate to contact me.

## New SE Alerts Informs Campus Across Multiple Mediums

SE Alerts, Southeast Missouri State University's new emergency notification system was launched Jan. 3. This new system deploys multiple communication tools simultaneously to alert the campus during emergencies, threats or any instance when the entire campus needs to be informed about events that impact the safety of students, faculty and staff.

SE Alerts will text mobile phones and send an email to University email account. Southeast students can also include additional email addresses to receive these notifications such as a parent or other family member.

As the new system is launched, students are encouraged to verify their contact information via the Southeast Portal to ensure the most current and correct

information is on file for use when Southeast deploys its SE Alerts emergency notification system.

For instructions on how your student should verify information on file, add a preferred number and add additional email addresses to receive SE Alerts, visit [semo.edu/SEalerts](http://semo.edu/SEalerts).

You may also like and follow SE Alerts on [Facebook](#) and [Twitter](#). Alerts will first appear in a mobile app. Crimes and threats also can be reported using the app.

For more information on SE Alerts, including instructions for installing the mobile app and for updating your emergency contact information on file, visit [semo.edu/SEalerts](http://semo.edu/SEalerts).
