

Bachelor of Science (BS)

Facilities Management & Sustainability Option

Technology management is a field of study designed to prepare technical and/or management-oriented professionals for employment in business, industry, education, and government. Technology management is primarily involved with the management, operation, and maintenance of complex technological systems while engineering and engineering technology are primarily involved with the design and installation of these systems.

Facilities management & sustainability students will...

- Be prepared to manage facilities, people, and the organizational strategies within a sustainable and professional environment.
- Be prepared for interaction with other professionals such as architects, engineers, contractors, and construction and maintenance personnel.
- Learn how to plan, design, and manage facilities.
- Learn about duties falling into several categories relating to the integration of operations, maintenance, project management, quality assessment, technology, people, and sustainability as they relate to facility construction and operation.

Career Planning

A St. Louis Outreach Office, located in Chesterfield, Mo., provides career exploration assistance, resume critiques, interview tips, job search strategies and more.

Demonstrated Career Proficiency is a Requirement of all Southeast Students		
CL001/CL002	First Semester	Complete the FOCUS2 assessment and develop a Career Action Plan.
CL003	Junior Year	Students gain information about career planning and job searching resources.
CL004	Senior Year	Students demonstrate advanced proficiency by identifying a position in their field, developing a cover letter, and tailoring a resume for the position. Materials are critiqued to ensure preparedness for a successful job search.
Career Services, located in Academic Hall 057, provides professional career advising to guide students in their career development.

Professional and Student Organizations

The Construction Management Organization (CMo) offers professional development, social interaction, and leadership opportunities to the students in the construction management and design program of the Department of Industrial and Engineering Technology. CMo also sponsors a team to a student competition in the fall.

The ASHE introduces students to the challenging profession of healthcare facilities management. The goal is to network students with hospitals and healthcare providers through training, meetings and activities. The desired outcome is to identify trends, needs, training, and growth opportunities for both the students and the healthcare organizations.
