

Bachelor of Science (BS)

Psychology

Psychology is the scientific study of all aspects of human behavior and mental processes. The major provides a general background in basic processes (learning and memory), cognitive processes, social psychology, developmental psychology, clinical/personality psychology, and statistics and research design. Students are prepared for a variety of careers in social services, human resources and business areas. It also provides the foundation for graduate study in specialized areas of psychology. Students may participate in psychology clubs and honor society activities, as well as conduct their own research with faculty mentors.

Psychology students will...

- Interact with qualified faculty in small class settings
- Be prepared for careers or graduate study
- Be able to participate in our annual Student Research Conference
- Participate in and develop psychological research
- Be able to participate in career-relevant internship opportunities

Career Planning

The majority of psychology majors find employment within a year of graduation, if they choose not to pursue graduate education. Beginning psychology majors take a course in career planning and development to help them explore potential careers and develop a strategy to pursue their desired career.

Career preparation is part of the mission of Southeast. In fact, more than 90% of Southeast students participate in internships, clinical opportunities, student teaching, research assistantships, and study abroad.

Professional career counselors are available for all students. The Office of Career Services in Academic Hall 057 can provide students with professional career counseling, resume critiques, practice interviews, job search strategies, career events, networking opportunities, and more.

Demonstrated Career Proficiency is a Requirement of all Southeast Students

CL001/CL002	First Semester	Complete the FOCUS2 assessment and develop a Career Action Plan.
CL003	Junior Year	Students gain information about career planning and job searching resources.
CL004	Senior Year	Students demonstrate advanced proficiency by identifying a position in their field, developing a cover letter, and tailoring a resume for the position. Materials are critiqued to ensure preparedness for a successful job search.
