

Pre-Professional Program

Pre-Architecture

The purpose of the one-year pre-professional program is to provide preparatory educational experiences for those seeking to apply for admission to another University for the completion of a professionally accredited degree in architecture. The coursework provides an important opportunity for students to explore their interests and level of commitment before applying to an architecture school (but doesn't guarantee that all the courses will transfer). The courses are met as a foundation for students interested in an architecture program. Students will need to work closely with the school in which they plan to transfer to ensure optimal transferability of coursework.

The Courses below are specifically geared to provide preparatory educational experiences for those seeking to transfer to Southern Illinois University at Carbondale for the completion of a professionally accredited degree in architecture. Upon completion of an approved sequence of courses, students should apply for admission to the School of Architecture preferably by March 1st (for fall admission).

Students who decide not to transfer could apply some courses from the pre-architecture curriculum to the Technology Management major, Construction Management and Design option.
