

**Bachelor of Science (BS)****Animal Science Option**

Agriculture, like most of our world, has changed dramatically and is infinitely more complex than most people can imagine. Today, most agriculture is seen as a technology-based industry that includes production, agriscience and agribusiness. Not only are agriculture graduates in demand to produce food, but also to package and transport it, market it, regulate its production and finance it. Using technology ranging from natural systems to artificial insemination agriculture graduates play key roles in planning for the efficient and safe future use of our animals, land and other natural resources.

Agribusiness: Animal Science majors take a variety of business-related courses such as: accounting, management, marketing, sales and finance while focusing on option specific courses like animal reproduction, animal breed improvement, animal diseases, nutrition, horse science and beef production.

**Your Home Department...**

/ The Agriculture Department has a high number of scholarships, last year awarding more than \$650,000 to students.

/ Faculty sponsor nine Agriculture clubs to help students develop leadership skills and serve the community.

/ All Agriculture Department facilities employ eager students to expand experiential learning and facilitate career readiness.

**Becoming Career Ready...**

/ Faculty with experience in various agribusiness areas work closely with students by providing them with faculty-mentored guidance and professional development opportunities. Students receive personal curriculum advisement from their advisor.

/ The Animal Science option prepares graduates for positions in management, sales, marketing, policy and related areas in the animal industry. Example job titles include animal technician, nature conservation officer, farm manager, breed analyst, extension educator and veterinary technician. The Animal Science also provides an excellent basis for graduate work leading to a master's degree or doctorate.

/ 100% of Southeast programs offer real-world experience. Agribusiness students earn this experience through a required internship or research project. Agribusiness students are also able to gain valuable hands-on experience in the classroom and at the departmental facilities.

/ The path to a successful career starts with you! You can maximize your career development by working closely with Career Services and Southeast faculty – they are here to help you connect your passions, interests and skills to jobs and opportunities in the field. Career Services provides professional career counseling and coaching, resume critiques, practice interviews, job search strategies, career events, networking opportunities and more.
