

Healthcare Management: Informatics Option

Bachelor of Science (BS)

Informatics Option

The U.S. Bureau of Labor Statistics (BLS) reported wage and salary employment in the medical and health services management category is projected to grow 23 percent between 2012 and 2022. This growth rate is much faster than other industries. While many of these jobs are for practitioners, nurses, and allied health professionals, many others have duties that do not include hands-on patient care: for example, marketing, human resources, finance and administration positions. This degree will help fulfill the need for non-clinical healthcare employees and is also appropriate for practitioners who desire to move up in clinical management or out of direct patient care into a support role.

The Informatics option focuses on the critical areas data management and reporting. This program is focused on the end-user and the ability to report and analyze data.

Becoming Career Ready...

/ Qualified, award winning faculty interact with students in a small class environment, in Robert A. Dempster Hall, an efficient and beautiful business building with a look and feel of a corporate environment.

/ Informatics graduates are in high demand because of the intersections of two hot disciplines – technology and healthcare – combining skills such as systems management, coding and organizational analyses. Examples of job titles include health informatics specialist, clinical informatics specialist, medical and health service manager, clinical analyst and clinical informatics manager.

/ 100% of Southeast programs offer real-world experience. Informatics students earn this experience through participating in practicums and internships designed to provide practical experience in healthcare organizations.

/ The path to a successful career starts with you! You can maximize your career development by working closely with Career Services and Southeast faculty – they are here to help you connect your passions, interests and skills to jobs and opportunities in the field. Career Services provides professional career counseling and coaching, resume critiques, practice interviews, job search strategies, career events, networking opportunities and more.

Potential Internship and Employment Opportunities:

- Hospitals
- Insurance Companies
- Medical Office Practices
- Government Agencies
- Home Health Care
- Counseling Centers
- Medical Practice Management
- Risk Management
- Healthcare Technology Companies

Special Options for Healthcare Management Majors

This program of study is also available as an online program.

Southeast offers a Master of Science in Healthcare Management. Up to 12 hours of 500 level courses may be dual-transcripted with the MS in Healthcare Management.
