Health Promotion Option

The health promotion option of health management gives students the necessary knowledge, skills and competencies needed to plan, implement and evaluate wellness programs in a variety of settings. The cornerstone of most wellness programs is physical fitness; therefore, a major part of the curriculum involves teaching students the skills required to be effective fitness professionals. Many of these skills are based on the knowledge, skills, and competencies desired by the American College of Sports Medicine, which is the preeminent professional organization for fitness and wellness professionals. The certifications offered by this organization are the gold standard for the field. The health promotion curriculum prepares students to pass the American College of Sports Medicine’s Personal Trainer Certification.

The curriculum provides students with the background necessary to apply scientific principles to comprehensive wellness programs. Students are taught how to design health promotion interventions for a variety of settings. These interventions include exercise, weight loss, nutrition education, health screening and assessment, stress management, back care, ergonomics, substance abuse prevention and smoking cessation. Students also learn to apply theories of behavior change to assist individuals of varying health status and fitness levels make lifestyle changes. Students who complete the health promotion program have had ample opportunities to apply knowledge and practice skills learned in the classroom and laboratory setting in the real world. Faculty monitor students’ progress along the way.

Becoming Career Ready...

/BS in Health Management: Health Promotion majors have the opportunity to gain hundreds of hours of real-world experience prior to graduation.

/Health Promotion graduates work in fitness, nutrition, wellness and rehabilitation settings, including corporate settings. Examples of job titles include corporate wellness coordinator, community health worker, health services manager, health coach, public health educator and medical sales representative.

/Faculty work closely with students to help them gain the skills needed to be effective wellness/health promotion professionals.

/Students in the program gain a wide variety of exercise testing and exercise programming skills.

/Health Management: Health Promotion students learn how to apply basic scientific principles for a wide variety of interventions.

/100% of Southeast programs offer a real-world experience. Health Promotion option students gain this experience through a required internship and practicum. Students complete a 480 clock-hour internship at the completion of the degree program. The internship provides not only an invaluable work experience but also often leads to employment.

/The path to a successful career starts with you! You can maximize your career development by working closely with Career Services and Southeast faculty – they are here to help you connect your passions, interests, and skills to jobs and opportunities in the field. Career Services provides professional career counseling and coaching, resume critiques, practice interviews, job search strategies, career events, networking opportunities and more.
