Biology Education

Bachelor of Science in Education (BSED)

The B.S. Ed. in Biology Education prepares highly qualified teachers of biology once all degree requirements and assessments are passed. Students have an exceptional program of professional preparation including field experiences, theory and pedagogy courses. The major in biology is well rounded helping teachers develop a strong foundation of biological knowledge. Once initial certification is obtained, additional areas of science may be added by passing the Missouri Content Assessment MoCA exams, as of present. Science teachers are in high demand across most of the United States and particularly in Missouri. Because of this there are forgiveness programs for different types of Federal loans in return for teaching science in a high needs school district (most in Missouri). In addition, students may be eligible to participate in the TEACH grant program which can pay up to $16,000 in college costs over four years and has a similar loan forgiveness program. Be sure to consult the financial aid office for details.

Becoming Career Ready...
