Location
Located on the banks of the Mississippi River, Cape Girardeau is a college town of 46,000 residents. Interstate 55 links Cape with St. Louis two hours to the north and Memphis three hours to the south. Southeast operates regional campuses in Kennett, Malden and Sikeston, Mo.

Enrollment
More than 12,000 students come from nearly all 50 states and 50 countries. Ninety-eight percent of classes have fewer than 50 students.

Curriculum
Southeast offers 200 areas of study and more than 1,000 courses in business, education, the health professions, liberal arts, science, technology, and the visual and performing arts.

Financial Aid
Renting can save 75 percent of the cost of purchasing textbooks. Southwest offers a variety of scholarships, loans, grants and work opportunities including many federal and state programs. Merit scholarships are awarded at the time of admission. To be considered for the maximum aid, apply by admission by December 15 and have your FAFSA processed by March 10.

River Campus
Classic beauty and modern technology converge at Southwest’s new campus – Missouri’s only campus dedicated to art, dance, music and theatre.

Study Abroad
Affordable study abroad programs enhance your academic experience.

Student Activities
More than 150 organizations include fraternities and sororities, honors societies, NCAA Division I athletics and more than a dozen musical groups including the internationally recognized Golden Eagles Marching Band.

Residence Halls
Eleven residence halls house in many different styles including community-style, suite-style and small group living. All rooms provide Internet access and cable TV. Wireless Internet is available across campus, in most student lounges and in the new residence halls.

Library
Students can access statewide holdings of more than 60 academic libraries, including more than 17 million volumes that can be delivered to campus within 48 hours. Kent Library is an Official Government Document Depository and home to the William Faulkner Collection of Louis Daniel Brodsky. Kent Library includes a modern Information Commons and multimedia rooms for small group presentation preparation.

Equal Opportunity Employer/Affirmative Action Institution

Master of Science in Organizational Management

If you are currently employed as a manager or seeking advancement in the area of management, this master’s program is for you. It is especially suited for people who do not have an undergraduate degree in business administration but are employed in positions with managerial responsibilities. The additional management training enables managers to improve performance in their current position and advance to mid-level managerial positions. The program provides management knowledge appropriate for working within a business organization or corporation and also enhances career options for those in other industries, such as health, advertising, non-profit or engineering.

The Master of Science in Organizational Management (MSOM) is designed for non-industry specific education, providing the student with a broad managerial perspective. Electives allow the student to focus on specific areas of management such as human resources or supervisory management. Graduates are prepared for the challenges that managers face.

The Donald L. Harrison College of Business is accredited by AACSB International—the Association to Advance Collegiate Schools of Business, which is recognized worldwide as the leading accrediting body of graduate business programs. The 30-hour program is built on a common core of 21 hours of general management courses. Students gain a basic understanding of management and statistics with special emphasis on application of these theories in the managerial decision-making process. Nine hours of elective courses are selected by students that focus on their areas of interest. The program can be completed in two years of part-time enrollment or one year full time.

Business

Accreditation

In addition to accreditation by AACSB International, our business programs also are accredited by the Network of International Business Schools (NIBS) recognizing us for “deep” internationalization of all facets of our business program. Only four institutions in the U.S. have received this distinction. In addition, Southeast Missouri State University is fully accredited by the North Central Association. University accreditation ensures a strong instructional environment for the MSOM program.

Eligibility

- Prepare for a career in business
- Gain management knowledge
- Enhance career potential
- Boost advancement potential
- Career Services assistance

Faculty

Our business faculty are experienced in their fields and share their personal knowledge of contemporary business practice with you and students from around the world. Nearly 100 percent of faculty teaching in the MSOM program have doctoral degrees. Courses are scheduled so that you can complete the program in less than two years. Class sizes are intentionally small because we believe the best learning takes place in an environment where faculty and students can interact and conduct one-on-one discussions. Nearly 100 percent of the classes are taught by full-time faculty.

With support from a substantial endowment, nationally recognized faculty, state-of-the-art technology and a premier business building, you will receive a degree that is useful around the world.

As you walk through Robert A. Dempster Hall, you immediately feel the corporate-like environment. One of two digital displays greets you with breaking news and real-time stock quotes.

You see classrooms that view the world via the Internet, cable TV and direct satellite access, showing you people and places around the globe, making international study exciting and alive. Every classroom has electronic presentation capability. In addition, students and faculty interact in two fully mediated business policy classrooms.

You see interactive television classrooms that broadcast courses off-campus and a 400-seat multimedia auditorium where students learn from experts in global marketing or finance, business entrepreneurship, or designers of information systems. Five computer labs are active with 200 networked computers loaded with the latest business software and students busy working on their latest business venture.

Five computer labs are active with 200 networked computers loaded with the latest business software and students busy working on their latest business venture.

Between classes students discuss group projects and study or relax in large comfortably furnished common areas.

Technology 24/7

Business faculty and staff have created a teaching and learning environment that empowers you to use advanced technologies to promote your career. These emerging technologies make you competitive in the student business community.

Course work includes Flash (SWF/FLV), Windows media streaming video (WMV), QuickTime movie (MOV), Real Media streaming media (RM), and MP3/MP4 animation technologies, to name a few. Class materials can be accessed through podcasting/realizing in MP3, MP4, 3GP or other formats. We have extended teaching and learning beyond the static terminal of desktop computers to anytime, anywhere, anywhere via video streaming, iPods, laptops and other wireless devices.

Employers and students value our technosavvy environment. Southeast ranked in the top 7 percent in learning to use and manage technology. The survey of 96 schools included universities such as Boston University, Johns Hopkins, Loyola, Michigan State and St. Louis University.
