Re: ED 535 / 035 The Trauma Informed Professional

In response to the national trauma movement in public schools and social service agencies, a Trauma Task Force committee was formed consisting of various faculty from the EHHS college and community. The committee developed a new course on trauma (ED 535: The Trauma Informed Professional) and is submitting it for approval. The course is applicable to all majors within the college and has no prerequisites.

The unique aspect of this course is that it contains an experiential learning-based lab (ED 035) to teach students evidence-based resiliency-building practices to not only aid in their work with children but also to benefit themselves. The course is structured as a two-day a week, 1.5 hours lecture and a one-day a week, 50-minute skills-based lab component delivered across a 16-week regular semester. Each lab section is limited to around 12 students as research demonstrates a group of this size generates better cohesion and outcomes. The course is modeled after an intro to chemistry course with all students attending lecture in a large lecture hall taught by the professor. There will be various lab sections offered, taught by counseling graduate students. A lab manual will be provided along with a required training for all graduate students teaching a lab section.

The information for both the lecture component and lab component are combined into one syllabus (ED 535 Syllabus).
